Preventative Care Points

Preventive health care refers to the actions you take (before you get sick) to stay healthy. So why should you visit the doctor when you're healthy? Emotion Labeling Exercise – 500 Points

Research shows it helps to be able to name our feelings in a very specific way. For example, people who can tell the difference between their emotions are less likely to drink too much when they are stressed and less likely to get angry at someone who hurts them. Some studies also show that learning new feeling words and practicing using them can help people manage their emotions better. This tool is designed to help you learn more feeling words.

Complete this activity to expand your emotional vocabulary.

Your code for Wellable Points will be given after you finish the activity.

Strengths Assessment – 500 Points

Take this **Strengths Assessment** to help you recognize your core strengths, like empathy, curiosity, and self-regulation.
